Education

Master of Computer Application <i>Department of Computer Science, University of Delhi</i>	2021 – 2024
Bachelor of Science(Hons.) in Computer Science <i>Aryabhatta College, University of Delhi</i>	2018 – 2021 CGPA:8.42
High School <i>Kendriya Vidyalaya No. 1 AFS, Gurugram</i>	2017 – 2018 Scored 90.8%

Experience

Software Developer Intern <i>Keywords Studios</i>	Feb 2024 – Dec 2024 Gurgaon
• Created an Archery game using SFML, leveraging Mathematical and Physics principles for Game Mechanics. • Managed a Node.js server for a Multiplayer Chess game using a three-layer architecture: Frontend (HTML/CSS/JS) with real-time communication via Socket.io, JSON requests via Axios to a C++ backend, and request/response handling in the C++ backend using ASIO. • Developed a full-fledged Match-3 game in Unreal Engine, integrating animations, audio, multiple levels, and complex gameplay logic. • Tested a Flutter-based Word Game on various devices, identifying and reporting bugs to improve cross-platform functionality and user experience.	

Projects

WordGeek - Wordle Clone <i>Kotlin, Android Studio, Firebase</i>
• Developed a popular word guessing game 'Wordle' clone with additional features using MVVM architecture. • Added the feature to guess multiple words simultaneously and of different length with shareable links to challenge your friends. • Integrated voice input functionality to guess words using our voice. • Utilized Retrofit to make API calls and fetch meaning for a word. • Implemented Online multiplayer using Firebase Realtime Database.
DealScout - Price Tracker <i>Kotlin, Android Studio, JSoup, Room Database</i>
• Enabled users to track wishlisted products from Ecommerce platform with integrated WebView. • Utilized JSoup for web scraping to fetch product details. • Leveraged Room database for efficient local storage of wishlisted products. • Employed Glide library to display product images fetched from URLs. • Implemented Android WorkManager for periodic price checks and updates notifications.

Technical Skills

Languages: C++, C , Javascript , Kotlin , SQL
Game Development: Unreal Engine (Blueprints C++), SFML
Android: Android SDK , MVVM Architecture , Room , Retrofit , Glide , Firebase , WorkManager
Web: Node.js , Express.js , Socket.io , Axios
Tools: Git, Github
